

# HERITAGE TERRAGLAZE

## TERRA COTTA FINISH REPAIR COATING

### *Product Data Sheet*

### Advantages of Terraglaze

Very good adhesion to mortar or to Terra Cotta
Highly abrasion resistant
Stain and chemical resistant
Gloss or satin finish
Color fade resistant (color matching on request)

### Packaging

1-gallon or 1 quart

### Surface Preparation

Surface must be dry and free of waxes, grease, oils, silicones, glues and dirt. Sand glossy areas thoroughly with sand paper (no. 200). No primer required.

### Application Procedures

Stir well before use. Use only with adequate ventilation. Use brush, roller or spray gun.

### Drying Time

6 to 8 hours at 75°F (24 C°). Drying time varies with surface temperature and film thickness. Recoat after 16 hours.

### Clean Up

Clean spills and brush after each use using mineral spirits.

### Coverage

1 quart covers approximately 50 square feet.

**WARNING: CONTENT IS HARMFUL.** Do not swallow. Do not breathe fumes. Keep out of reach of children.
